TITAN

31 SERIES

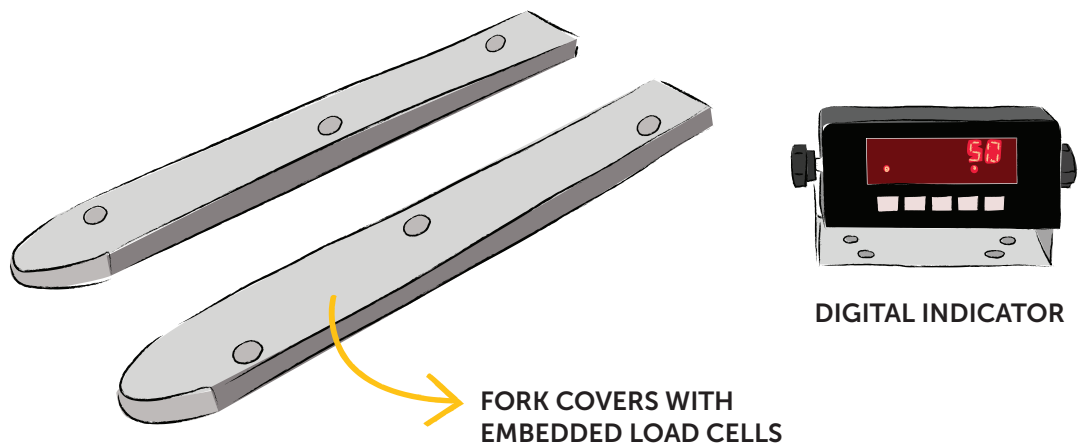

WEIGHT-SENSING FORK COVERS

The Titan 31 Series comprises of various scales all featuring our weight-sensing fork cover design. This series is compatible with most forklift trucks, telehandlers, stackers, order pickers and electric walkies on the market.

With no modification to existing equipment our Titan 31 Series can be easily removed and re-installed or transferred between trucks.

The system comprises of two main components: one set of weight-sensing fork covers and an indicator.

Features & Benefits:

- ▶ Patented, weight-sensing fork cover design
- ▶ Highly accurate; 99% or better +/- 15 lbs.
- ▶ Rugged, heavy duty construction and weatherproofing suitable for outdoor and freezer applications
- ▶ Perfect for attaching to leased equipment
- ▶ Does not down rate the truck capacity
- ▶ Light-weight system; reduced shipping cost
- ▶ High overload capacity
- ▶ Large bright LED weigh display included
- ▶ Adaptable to most data equipment systems
- ▶ Minimal truck alternation maintains original manufacturer warranty
- ▶ Power derived from truck's battery
- ▶ Maintains original fork profile; adds just fractions to existing forks: 0.625" thickness, 0.5" length, 0.875" width, 0.35" lowered height
- ▶ Made in Canada

Options:

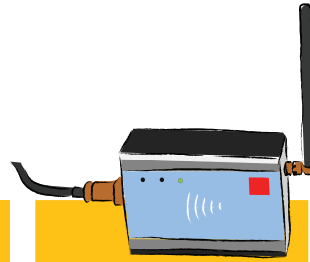

Specialized
Digital Indicator

Overload Alarm
(buzzer and/
or light)

Label or Thermal
Paper Printer

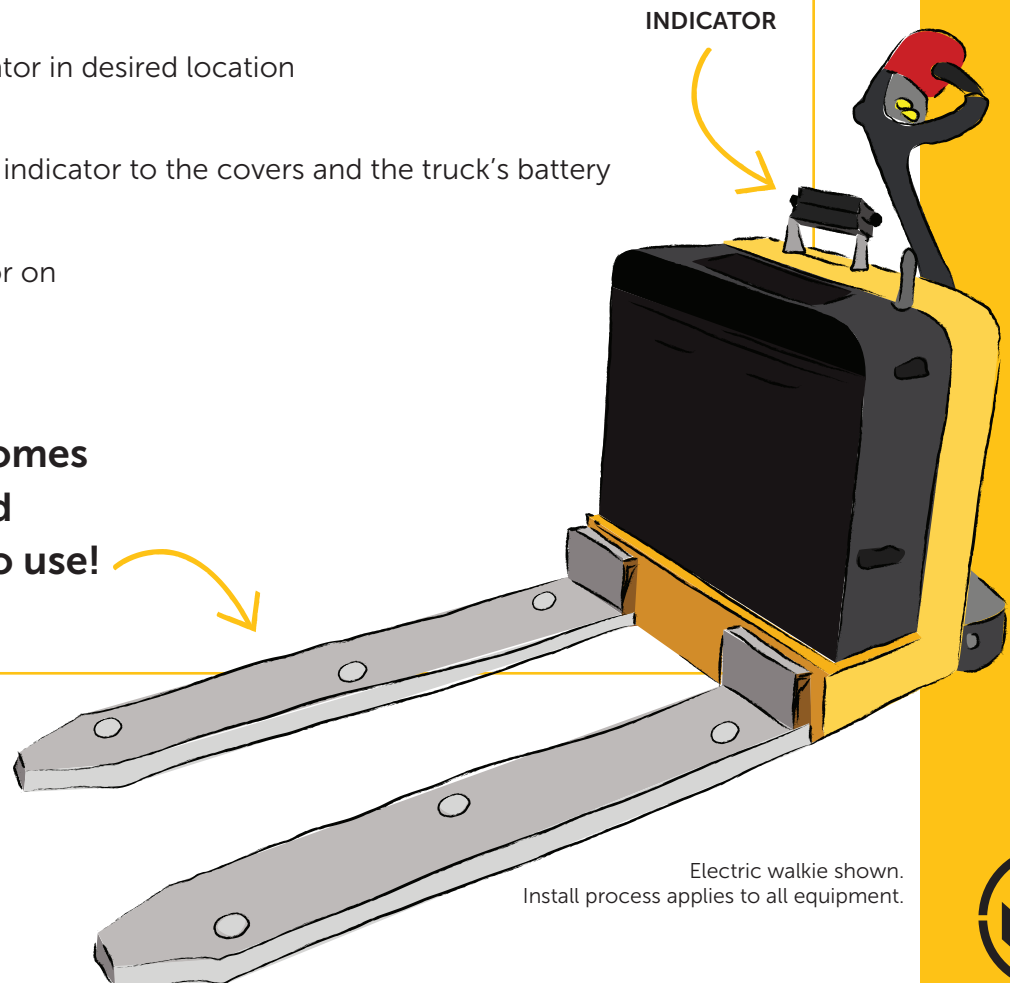

Wireless
Transmission
(between carriage
and cab)

Follow our quick, self-install system

- 1 Secure the fork covers onto the truck's forks
- 2 Mount indicator in desired location
- 3 Connect the indicator to the covers and the truck's battery
- 4 Turn indicator on

The system comes
pre-calibrated
so it's ready to use!

Electric walkie shown.
Install process applies to all equipment.
